In this issue

- Project meetings
- "Deep in Literacy. A Blended Course on Functional Literacy and Education for Bettering Basic Skills"
- Next activities

Project Meetings

Due to the ongoing pandemic of COVID-19, project partners conducted three online meetings. The first one, kick-off meeting was held on 24th-25th November 2020.

During the meeting, partners had an opportunity to introduce themselves as well as present the project framework and plans for the next activities.

"Deep in Literacy. A Blended Course on Functional Literacy and Education for Bettering Basic Skills"

"Deep in Literacy" is an integral part of the project LearnersMot 2, a continuation of the already finished LearnersMot project (www.learnersmot.eu), both devised and conducted within the Erasmus+ Programme. This blended course primarily targets adult educators, helping them to understand the complex phenomenon of functional (i)literacy and its concepts. It consists of six modules containing theoretical texts, videos, face-to-face practical activities, and interactive activities based on digital methods. The six modules encompass concepts related to social, work and cultural areas of life, the topic of motivation for learning, numeracy, and digital methods in older adult education.

Stay tuned! The course will soon be available online.

Next activities

- The partnership will be developing a mobile application for low-educated and low-skilled adult learners. The application will be related to the Conceptual Background Paper and the Deep in Literacy Course. Like the rest of the project outputs, it is meant to better adult learners' basic skills.
